ABSTRACT

COVID is causing an uprising first identity way off Wuhan city Hubei, territory China. Case has been transport clamor Thailand Japan along with South Korean exterior icon. No case has been identifying way off affecting United States. Chinese fitness command have report a further patient have accomplished fever, cough, adversity breath along with pneumononia. COVID 19 are named matter of course stick a further come through occasionally their membranes like the sun corona. Such Trojan horse agency various disorder certainly affecting respiratory tract ranging, occasionally affection g common cold clamor severe contagion like SARS. According to rule clamor affecting world Health organization universal symptoms certainly contagin add fever, cough along with respiratory difficulties the shortness certainly fitness. Austere case can ahead clamor pneumonia, kidney failure along with even annihilation.

Keywords: COVID 19, Pneumononia symptoms, sign, types, transmission, treatment

INTRODUCTION

COVID -19 are kind certainly Trojan horse a further typically act on affecting respiratory tract certainly mammals, along with individual. They are related combat affecting common cold pneumonia along with severe acute respiratory syndrome (SARS) along with can additionally along with affecting gut. A COVID-19 combat

first isolated way off 1937 matter of course an coatigan bronchitis Trojan horse way off fowl a further affecting capability clamor determinedly demolish poultry stocks. These Trojan horse are amenable matter of course among 15 along with 30 percent certainly common colds. Over the least 70 years, scientists have been construct a further COVID -19 could disease, rats, dogs, cats,

turkeys, horse's pigs along with cattle. This MNT awareness center article will target above affecting various kind certainly they are transport ,along with dual or two especially alarming contagion a further can be caused aside COVID-19 SARS along with MERS.

Fast facts on COVID-19:

Unable is no treatment matter of course affecting common cold. A COVID -19 caused both SARS along with MERS. COVID-19 disease most various species. Unable are six known individual COVID -19 SARS stretch China clamor caused epidemic way off 37 countries killed 774 individual.

COVID -19:

Human corona viruses (Hcov) combat first identify way off affecting 1960s way off affecting noses certainly patients combat affecting common cold. Two individual COVID-19 are answerable matter of course a vast amplitude certainly common cold oc 43 along with 229 E. COVID -19were accustomed their name abominable on the crown -like projections on their covering. COVID -19 way off Latin meaning halo or crown. Amidst individual epidemic many generally action beyond affecting winter month as well as initial spring. It is not abnormal matter of course a man a further is

cause aside a combat a COVID-19 along with clamp it encore precisely four months after. This is the as long as COVID -19 antibodies do not end I g matter of course a very elongate time. In spite of affecting antibodies matter of course one strain certainly COVID-19 may be used decreased adjoin another strains.

Sign:

Common individual COVID -19 along with kinds 229 E ,NL 63, oc43 along with. KUI, commonly caused mild clamor balanced upper, respiratory tract illnesses, like affecting common cold. Many individuals get infection combat these Trojan horse at few point way off their lives. These illnesses commonly just ending matter of course a less volume certainly time. Sign many accommodate 1.Runny nose 2.Headache 3.Giols 4. Sore throat 5. Fever 6.A general feeling certainly being unwell.

Human COVID-19 can at times caused lower- respiratory tract illnesses such as pneumonia or bronchitis. This is most common way off individual combat cardiopulmonary disorders, individual combat adulterate protective system, immature along with older fully grown. Two another individual COVID-19 MERS cov and SARS cov has been known clamor sometimes caused severe sign MERD sign at

usual along with fever, cough along with shortness of breath, which generally advance clamor pneumonia. Precisely 30 out of every 100 patients reportedly combat MERS case continued clamor action basically way off affecting Arabian peninsula. SARS sign generally along with fever, chills along with body aches which at usual advance clamor pneumonia. No individual case certainly SARS has been reputedly anywhere way off affecting world since 2004.

Transmission

Human coronaviruses are most often transmitted through the air by infected people coughing and sneezing. Touching or shaking hands is one example of close intimate interaction. Touching an infected object or surface, then touching your mouth, nose, or eyes before washing your hands. Occasionally, faecal contamination occurs. People in the United States are often infected with common human coronaviruses. Most people will become infected with one or more of the prevalent human coronaviruses at some point in their lives. Young children are the most vulnerable to infection. People, on the other hand, might have many infections in their lives.

Prevention and Treatment

There are no vaccinations available to defend against human coronavirus infection at the moment. Hands should be washed often with soap and water for at least 20 seconds. Unwashed hands should not be used to touch the eyes, nose, or mouth.

Protection

Stay at home if you are unwell. Avoid making direct eye contact with people. When you cough or sneeze, cover your mouth and nose with a tissue, then throw the tissue away and wash your hands. Objects and surfaces should be cleaned and disinfected.

Treatment

There are no particular therapies for human coronavirus infections. The majority of patients suffering from common human coronavirus infection will heal on their own. Take pain and fever relievers (Caution: do not give Aspirin to children). To relieve a sore throat and cough, use a humidifier in the room or take a hot shower. Drink lots of water. Stay at home and recuperate.

There is comprehensive diagram of coronavirus (**Figure 1**).
